

Version management and updating

There are important differences between "versioning and updating" and "updating".

Versioning is used when your product, component, risk assessment or function day average has changed. You then save as "new version".

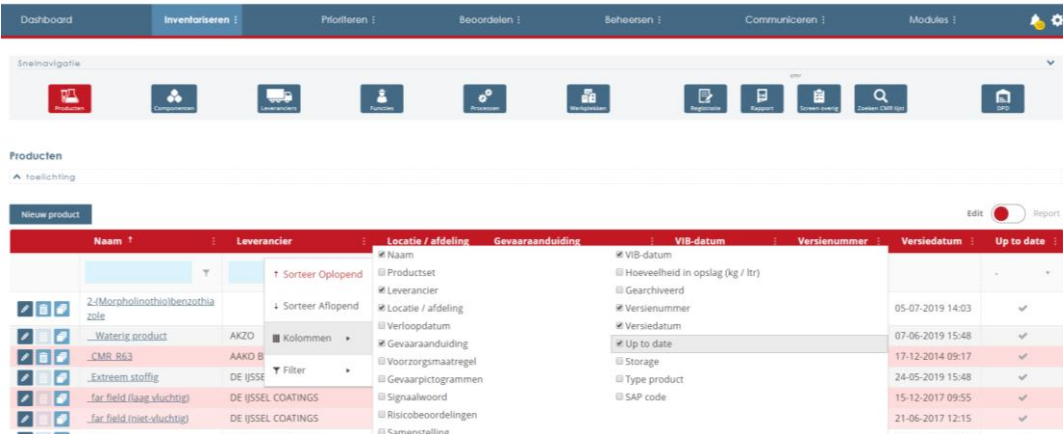

"Update" is done in report overviews such as the product overview and the RI&E overview. If you have made some changes in the red edit section, this will not automatically appear in the blue report section. You can update this manually or this is done automatically at night.

1.1 Version management

1.1.1 What do you need to do to link the latest version to your product, RI&E or job day average?

Step 1

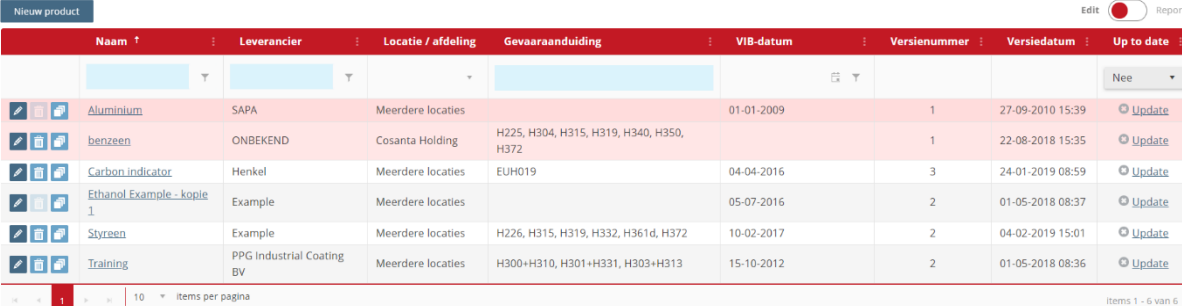

Click on the three dots in the red bar, here you can compile the overview yourself. In the overview, choose: "version number", "version date" and "up to date".

Naam	Leverancier	Locatie / afdeling	Gevaaraanduiding	VIB-datum	Versienummer	Versiedatum	Up to date
ZijMorpholinooxibenzothiazole						05-07-2019 14:03	✓
Waterig product	AKZO					07-06-2019 15:48	✓
CMB B3	AAKO B					17-12-2014 09:17	✓
Extreem stoffig	DE IJSSE					24-05-2019 15:48	✓
far field (laag vluchtig)	DE IJSSEL COATINGS					15-12-2017 09:55	✓
far field (niet vluchtig)	DE IJSSEL COATINGS					21-06-2017 12:15	✓

Step 2

Under "up to date", select "no".

Naam	Leverancier	Locatie / afdeling	Gevaaraanduiding	VIB-datum	Versienummer	Versiedatum	Up to date
Aluminium	SAPA	Meerdere locaties		01-01-2009	1	27-09-2010 15:39	Update
benzeen	ONBEKEND	Cosanta Holding	H225, H304, H315, H319, H340, H350, H372		1	22-08-2018 15:35	Update
Carbon indicator	Henkel	Meerdere locaties	EUH019	04-04-2016	3	24-01-2019 08:59	Update
Ethanol Example - kopie 1	Example	Meerdere locaties		05-07-2016	2	01-05-2018 08:37	Update
Styreen	Example	Meerdere locaties	H226, H315, H319, H332, H361d, H372	10-02-2017	2	04-02-2019 15:01	Update
Training	PPG Industrial Coating BV	Meerdere locaties	H300+H310, H301+H331, H303+H313	15-10-2012	2	01-05-2018 08:36	Update

In this case, you will see a product overview with products that do not have the latest version of a component.

Step 3

Click on "update". In this way, the products get the latest version of the components attached to them.

You can do the same for the overviews of risk assessments and function day averages.

- 1.1.2 *Update everything in one go*
You can also update everything in one go. All the latest versions are then linked to the Job Day Averages, Risk Assessments and products in one go.

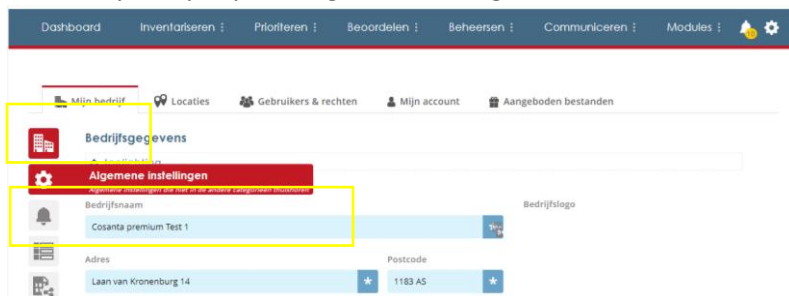

Step 1

Go to the cog icon at the top right of the blue bar in Stoffenmanager®.

Step 2

Go to "my company" and "general settings".

Step 3

Click the check mark. You can also choose to create new versions after calculating.

Data update & synchronisatie

Met de onderstaande functie kunt u de versies van alle producten en risicobeoordelingen up-to-date laten maken en opnieuw laten doorrekenen. Alle producten worden gekoppeld aan de meest recente versie van de componenten, alle risicobeoordelingen aan de meest recente versies van de producten, etc. Onderdelen die gearchiveerd zijn of in een alleen-lezen productset zitten worden niet geupdate.

Ik ben mij ervan bewust dat een update alle versies synchroniseert & alles opnieuw doorrekent

Nieuwe versie na doorrekenen ⓘ

You can also take the training courses. Part 3 focuses extensively on version control.

1.2 Actualiseren

Step 1

If you want to update, go to the product overview or the RI&E overview.

Nieuw product Edit Report

Naam ↑	Leverancier	Locatie / afdeling	Gevaaraanduiding	VIB-datum
Primer_015	Scheepsverf b.v.	Meerdere locaties	H226, H315, H318	14-09-2015
Primer_015 / 016	Scheepsverf b.v.	Meerdere locaties	H226, H315, H318	14-09-2015

Step 2

Go to the Report section

Laatst geactualiseerd: 04/12/2019 01:10

Actualiseren per product

Edit **Report**

Productnaam	WIK	VIB	Gevaaraanduiding	Gevaarpictogrammen
Cleaner_43			H315, H318	
Thinner_58			EUH066, H225, H304, H315, H319, H336, H373, H411	

Step 3

You click on "update". This takes a while.

Laatst geactualiseerd: 04/12/2019 01:10

Actualiseren per product

Edit **Report**

Productnaam	WIK	VIB	Gevaaraanduiding	Gevaarpictogrammen
Cleaner_43			H315, H318	
Thinner_58			EUH066, H225, H304, H315, H319, H336, H373, H411	

Now all products with their changes done in "edit" are also in "report".
